DETAILED ACTION

Allowable Subject Matter

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or would not have rendered obvious a system (Figs. 1, 2) of setting up an image display apparatus connected to an external unit, such as claimed in claims 1-8, the system including: a detecting section (14a) which detects a change in the state of the external unit corresponding to a specific operation by use of the remote-control terminal; a setting-up section (14b) which, when a change in the state of the external unit has been sensed, determines identification information about the remote-control code group including the remote-control code making the change in the state, creates the conversion information so as to correspond to the external unit, and stores the conversion information into the memory; and a control section (14) which, when the conversion information is not stored in the memory, creates the conversion information and stores the information into the memory.

The closest prior art- Kwon (US 7,038,738) and Kim (US 7,145,609) disclosed conventional system with controllable external units- either singularly or in combination, fails to anticipate or render obvious the present invention as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
